

G Pen Vaporizer Available @ VapeWorld

Before using the G Pen Hookah Vaporizer, consult manual for optimal efficiency.

### 1. GETTING STARTED

Ensure the following components are included:

- 1 Rechargeable G Pen Battery™
- 3 G Pen Hookah Tanks™
- 1 G Wall Adapter™
- 1 G Pen Wired USB Charger™
- 3 G Cleaning Tips™
- 3 E-Juice Containers

### 2. TURNING ON/OFF:

The G Pen Hookah Vaporizer is engineered with a locking mechanism to prevent accidental or inadvertent usage. To lock/unlock, press the button 5 times. The LED light on the G Pen Battery will blink 3 times to acknowledge this feature.

### 3. LOADING:

Each G Pen Hookah Tank is comprised of an Atomizer, Base, and Encasement. While in OFF/Locked position, unscrew Base from Encasement. Ensure Atomizer is securely threaded into top of Base before proceeding to load. Invert mouthpiece and fill perimeter of tank using the E-juice Container provided. Do not load E-juice into central pipeline or beyond half capacity of tank. With Atomizer attached to Base, screw Base into Encasement. Attach Hookah Tank to G Pen Battery.

### 4. CHARGING:

Prior to use it is advised that the G Pen Battery is charged in full. Connect the Wired USB Charger to the threading of the G Pen Battery. Connect the other end into any compatible USB port. Once connected, the G Pen Battery will blink 3 times indicating a successful charge is in process. Charging is complete when the red light on the G Pen Wired USB illuminates green. Please allow 3-4 hours of charge time for the initial 3 charging cycles.

**\* WARNING: Contents will heat and may remain hot after usage. Refrain from touching the G Pen Hookah Vaporizer and other items near the heating element for a minimum of 20 seconds after each usage.**
