

Before using the microG, read this manual to ensure correct usage and optimum efficiency.

1. GETTING STARTED

Ensure the following components are included:

- | | |
|----------------------|----------------------|
| 2 microG Batteries | 1 microG Charge Kit |
| 2 microG Coils | 5 Mouthpiece Covers |
| 2 microG Mouthpieces | 2 G Glass Containers |
| | 1 microG Tool |

2. LOADING microG

Each microG comes equipped with a microG Mouthpiece, a microG Coil and a microG Battery. While the device is in the OFF position, use the microG Tool provided to load your preferred essential oils onto the heating element of the microG Coil.

3. TURNING ON/OFF microG

The microG is engineered with a locking mechanism to prevent accidental or inadvertent usage. After each use, allow 15 seconds to prevent over heating. To lock and/or unlock, press the button 5 times. The battery will acknowledge that it is locked or unlocked by blinking the LED light 3 times. Once it is unlocked and your essential oils have been loaded, hold down the button to vaporize and enjoy.

4. CHARGING microG

To charge the microG, connect the wired USB charger into the bottom of the microG Battery, and the other end into any compatible USB port. The LED light on the bottom of the battery will illuminate red and remain lit while charging. When fully charged, the LED light will turn off. Please allow 3-4 hours to fully charge for the initial 3 charging cycles.
